Proects Undertaken

1] News Aggregator Service (NewsMedia)

Front end - HTML , CSS , JavaScript

Backend : PHP , MY SQL

Description : The initiate idea was to develop a website able to scrutinise all the news articles provided by the major news agencies worldwide for a given period of time and transform the content to easily read focal points.

- Fully Responsive Web Design make it look good on all devices (desktops, tablets, and phones)

- It includes various types of category like Business, Sports, Science and so on

- It has a tab called Contact Us so you are easy to Contact us , and our executive can quickly get in touch with you.

2] Guess The Number Game

Based On - Java

Environment - VS Code

- If the guessed number is bigger than the actual number, the program will respond with the message that the guessed number is higher than the actual number.

- If the guessed number is smaller than the actual number, the program will respond with the message that the guessed number is lower than the actual number.

- If the guessed number is equal to the actual number or if the N trials are exhausted, the program will end with a suitable message.

3] Stone Paper Scissors Game

Based On - Java

Tool - J.D.K. 17 LTS

- The following code uses Random.nextInt() function to take random input from computer player 1 and prompt user player 2 to choose an option rock, paper, or scissors and finishes the code by adding nested if-else statements to appropriately report "User won", or "Computer won", or "No Winner won (Both choose same)."
